Trans. of Stanki i Instrument (USSR) 1957 [v. 28] no. 2
p. 1-9.

The calculation procedure is given for arriving at the formulae giving the requisite rigidity of the lathe bed, regarding it as a thin walled structure, in a form which designers can use in practical cases. The calculation procedure is set out for the lathe bed, when regarded as a beam of the requisite and constant rigidity. The form analysis and the relative dimensions of the elements of the lathe bed, based on the above calculations, are also given. (Author)
